

RITISH MUNAGALA

Business Analyst | BBA (Finance) | Excel & Power BI | Data Analysis & Visualization

Hyderabad, Telangana, India | 9182128931 | ritishmunagala31@gmail.com | [linkedin.com/in/mritishh](https://www.linkedin.com/in/mritishh) | mritishh.github.io

PROFESSIONAL SUMMARY

Detail-oriented BBA (Finance) graduate with hands-on experience in content analysis, data management, business document review, and reporting. Skilled in extracting and structuring information from business documents and reports, with strong proficiency in Microsoft Office Suite (Word, Excel, PowerPoint) and Power BI. Adept at organizing and maintaining data for accuracy, consistency, and accessibility. Seeking to leverage analytical and communication skills in a Business/Data Analyst role to support data-driven decision-making, stakeholder engagement, and process improvement.

CORE SKILLS

Advanced Excel (Pivot Tables, XLOOKUP/VLOOKUP, Dashboards) | Microsoft Power BI | Data Analysis & Visualization | Prompt Engineering | SQL | CRM Data Management | TallyPrime | Business Reporting | Stakeholder Communication

PROFESSIONAL EXPERIENCE

Venkateswara Traders — Business Operations Analyst

May 2025 – May 2026

Hyderabad, Telangana, India

- Conducted structured training sessions for store personnel on products, services, and customer service workflows, contributing to improved operational efficiency and service-level KPIs.
- Leveraged advanced Microsoft Excel tools including Pivot Tables, XLOOKUP/VLOOKUP, and dashboards to analyze performance data, enhance reporting accuracy, and support data-driven decision-making.
- Built and managed a portfolio of 100+ clients within six months while maintaining CRM data integrity and supporting customer lifecycle tracking and revenue-related KPIs.
- Analyzed existing CRM processes and developed data-backed strategies to improve customer engagement, lead conversion rates, and overall system effectiveness.
- Utilized TallyPrime for operational and financial data management, supporting basic ERM activities and transaction tracking.
- Collaborated cross-functionally to prepare weekly analytical reports for store managers and senior leadership, translating insights into actionable business recommendations.

PROJECTS

Connect & Pool

Jul 2026

- Designed and built a full working frontend prototype for a location-first ride-pooling concept that matches travelers at high-traffic hubs (airports, railway stations, malls), enabling them to connect and mutually agree before booking instead of algorithmic mid-route pairing.
- Applied prompt engineering with Claude AI to translate the complete user journey — location detection, traveler matching, in-app chat, group formation, fare-splitting, live ride tracking, and post-ride ratings — into a functional, responsive web application.

Sales Performance Dashboard — FY 2025–26

Feb 2025

- Built an interactive sales analytics dashboard using Chart.js, processing 1,000 transactions worth ₹24.07 Cr in revenue across the Hyderabad region for FY 2025–26, with dynamic filtering by year (All Time / 2025 / 2026).
- Developed multi-dimensional visualizations covering monthly revenue trends, top products, sales rep leaderboards, channel distribution, customer segments, and top-performing cities, turning raw sales data into actionable business intelligence.

Customer Churn Prediction

Apr 2024 – May 2024

- Conducted exploratory data analysis (EDA) on 5,000 customer records in Excel to identify key churn drivers, including contract type (42% churn risk for month-to-month), tenure under 12 months (28% risk), absence of tech support (31% risk), and electronic-check payment (25% risk).
- Built a churn-risk segmentation model using statistical analysis and pivot-based dashboards, reducing the baseline churn rate from 17.0% to 14.5% across tracked segments.
- Designed a 5-segment retention action plan (loyalty discounts, proactive support, onboarding, auto-pay incentives, senior care) that cut churned customers from 850 to 723 — a 15% improvement in retention.

EDUCATION

Little Flower Degree College — Bachelor of Business Administration (BBA), Finance

Oct 2021 – Jun 2024

CERTIFICATIONS

- Deloitte Data Analytics Job Simulation
- SQL Foundations
- IBM Data Analyst
- Microsoft Power BI Data Analyst
