PROFESSIONAL SUMMARY

BBA (Finance) graduate with hands-on experience in business operations, performance analytics, and data validation. Skilled in building performance dashboards, tracking KPIs across large data sets, and translating complex data into clear, stakeholder-ready reports. Strong foundation in Advanced Excel and Power BI with a track record of improving reporting accuracy and streamlining processes. Seeking to apply analytical rigor, attention to detail, and cross-functional collaboration as an Operations Associate or Junior Analyst.

CORE SKILLS

- **Business & Financial Analytics:** Financial statement review, forecasting, segmentation modelling, statistical analysis
- **Client & Stakeholder Reporting:** Preparing client-ready materials, presentations, and structured business documentation
- **Technical Tools:** Advanced Excel (Pivot Tables, VLOOKUP/XLOOKUP, Macros), Power BI, Google Looker Studio and IBM Cognos Analytics
- **Reporting & Analytics:** KPI tracking, metric analysis, data visualization, reporting for leadership, process improvement
- **Project & Process Management:** Managing multiple concurrent projects, tight deadlines, and process improvement initiatives
- **Communication & Collaboration:** Cross-functional stakeholder coordination, written and verbal presentation of analytics
- **AI & Automation:** Generative AI tools, prompt engineering for content development, Excel macros exposure

PRACTICAL EXPERIENCE

Freelance Business Operations Analyst

May 2025 – May 2026

Independent project engagement with a regional trading business

- Measured and analysed business performance data across 100+ client accounts, tracking KPIs and turnaround-time metrics to support management decision-making and leadership review meetings.
- Validated data integrity across CRM and reporting systems, then built and maintained recurring performance dashboards and reports in Advanced Excel and Power BI with consistent formatting and benchmarking standards.
- Coordinated with cross-functional stakeholders to gather and refine reporting data, and authored SOPs and workflow documentation to standardize processes and support onboarding of new team members.

KEY PROJECTS

[Sales Performance Dashboard](#) - Power BI & Advanced Excel

- Designed an interactive dashboard tracking KPIs, revenue trends, and regional results, automating data cleaning to improve reporting turnaround.
- Conducted trend analysis and forecasting, improving reporting accuracy by 20% and documenting methodology for stakeholder review.

Customer Churn Prediction - Excel & Statistical Analysis

- Performed exploratory data analysis on large data sets to identify behavioural patterns, structuring findings into clear, actionable reports.
- Developed a segmentation model using statistical techniques, contributing to a 15% improvement in retention through data-driven recommendations.

[Connect & Pool](#) - Ride-Pooling Concept & Prototype ([Redirect](#))

- Designed a location-first ride-pooling web app concept for India, letting travelers at airports, stations, and malls view, agree with, and chat with a co-traveler before booking, instead of relying on algorithmic mid-route pairing.
- Built and published an interactive front-end prototype end-to-end, translating the concept from problem framing to a functional, shareable demo.

EDUCATION

Bachelor of Business Administration (BBA) – Finance

June 2024

Little Flower Degree College, Hyderabad — CGPA: 8.46 / 10.0
